

# How to cite Multiwfn

Tian Lu

Last update: 2020-Oct-24

Multiwfn is free-of-charge but not funded. The **best way** of supporting continued development of Multiwfn is properly citing my related works.

If Multiwfn is used in your research, citing the original paper of Multiwfn is mandatory:

Tian Lu, Feiwu Chen, Multiwfn: A Multifunctional Wavefunction Analyzer, *J. Comput. Chem.* **33**, 580-592 (2012) DOI: 10.1002/jcc.22885

My other papers should be cited according to the method and the function employed in your work, as described below.

- Quantitative molecular surface analysis (main function 12). In below paper the algorithm of this analysis and implementation in Multiwfn were described in detail
